Use Determination & Recommendation:

Comments:

Is the evaluated use attainable? ☐ Yes ☒ No

Comments: ERC performed two field surveys of the stream, in May and June, 2005. Three sites were evaluated in May, and a fourth site was evaluated in June. The UAA Report was completed in July, 2005. The most upstream site (May, 2005) was dry, and the stream did not meet the maximum or the average depth criteria at any of the three remaining sites. Because of the overall shallow depth of the stream, the committee recommends removing the WBCR designation.

Committee Recommendation: ☐ Retain Use ☐ Modify Use ☒ Remove Use ☐ Inconclusive
